TECH Fest Events – Official Rules & Regulations 2026

General Guidelines

- All participants must report to the event venue at least 30 minutes prior to the scheduled start time.
- Participants must carry a valid college ID card and event registration confirmation.
- Participants are expected to maintain discipline, decorum, and sportsmanship throughout the fest.
- Participants can take part in only one event.
- Participants must perform or create artwork within the allotted time only .
- Use of unfair means, plagiarism, or external assistance is strictly prohibited.
- Participants are responsible for their personal belongings; the organizing committee shall not be liable for any loss or damage.
- Any clarification regarding rules must be sought before the commencement of the event.
- Event coordinators will entertain all queries related to events between 9:00 A.M. to 4:00 P.M. on all working days.
- Last date for registration is 22nd February 2026.
- The participation fee once paid shall not be refunded under any circumstances.

For further queries kindly contact:

Aditya Dubey (8932056388)

Sonu Dubey (9219005627)

List of events

MOKSH Events List

Date - 26th February 2026

1. **Robo Soccer**
2. **Robo Race**
3. **Tug of War**

Technical Events List

Date – 25th February 2026

1. **Vibe coding**
2. **Tech Quiz**
3. **Mobile Gaming**
4. **Coding Contest**

ROBO SOCCER RULEBOOK

TASK:

- The objective of this event is to design and fabricate a manually controlled robotic soccer device that can compete against an opponent in a fast-paced arena-based football match.
- Each participating team must build a robot capable of maneuvering, pushing, and directing the ball toward he opponent's goal using only mechanical interaction. The robot must rely on movement, angle, speed, and strategy to control the ball.
- The robot must not directly grasp, hold, clamp, or lift the ball at any point during gameplay. All ball movement should occur through surface contact such as pushing, deflecting, or guiding.

ROBOT SPECIFICATIONS:

- The dimensions of the bot should be less than or equal to **30 cm × 30 cm × 20 cm** (l×b×h), failing which the team will be disqualified from the competition (this includes tires). No tolerance is permitted.
- The weight of the bot must not exceed 5kg. A tolerance of (±2.5%) is permitted.
- The dimensions of the remote are not included in the size constraint of the bot.
- The bot must be controlled manually only by one person, irrespective of the mechanism used.
- Both wired and wireless control options are available to teams. In the case of wired bots, the wire length should be at least 4 meters to ensure that the cable remains slack at all times. Participants should use a dual- frequency remote, Bluetooth, or Wi-Fi if they employ wireless technologies.
- The bot must have an onboard power supply for wireles usage.
- Participants are not permitted to use any prefabricated Lego parts or grasping mechanisms. Participants may, however, use pre-assembled gear assemblies.

BATTERIES & POWER:

- The machine must be powered electrically only. Use of IC engines/engines is not allowed.
- Batteries must be sealed, immobilized electrolyte type (gel cell, lithium, NiCad, or dry cells).
- The electric voltage anywhere in the machine should not be more than 25.2V DC at any point of time.

GAMEPLAY & MATCH RULES:

- Match Style : 1v1
- Ball is placed at the Center on every start.
- Two halves of 3 minutes each Total 6 minutes of match duration.
- Golden goal applies if tie persists.
- Safety inspection is mandatory.
- Only one operator is allowed no Controller will change during whole event.
- Intentional Arena damage can lead to disqualification.
- If both the bot get stuck together and one of them gets flipped, the bot will reset.
- 2 minutes allowed for inspection before each half.
- A Technical timeout of 90seconds can be taken by a team in a Complete match of 6 minute.
- Technical timeout is neither splitable nor accumulative.
- Power source is mandatory.
- Referee's decision will be considered final.
- No ball lifting is allowed.
- Five goal lead ends the match.

SCORING:

- Scoring is completely based on Goal done by a Team.
- It is based on Card System that includes -Yellow Card for Caution
- Red Card for Deduction in Goal

PENALTIES AND DISQUALIFICATION:

- Committing a foul by unnecessary hitting or sweeping the opponent's bot will result in a deduction of 1 point for the offending team.
- Any act of misbehavior or misconduct will lead to immediate disqualification.
- The Organizers hold the sole discretion to modify or adjust these specifications and rules at any time.
- Any alterations will be communicated to the registered teams.

ARENA SPECIFICATIONS:

- Arena Size: 8 feet x 6 feet.
- Plywood base.
- Classic Tennis Ball is used.
- Goal Post Dimension Size:450mm X 300mm

TEAM ELIGIBILITY:

- The team may consist of maximum 3 members.
- Inter College teams are allowed. Every participating member must carry their Valid ID Proofs (in hard copy).
- In case of any situation not explicitly mentioned in this rulebook, the final decision shall rest with the Organizing Committee, and such decision will be made in the best interest and spirit of the game.

EVENT COORDINATORS:

Shreyansh verma. 95543 53671

ROBO RACE RULEBOOK

TASK:

Design and construct a manually operated robot, either wired or wireless, strictly within the specified dimensions. The robot must be capable of smoothly navigating the entire track, including all turns and challenging sections, without external assistance. Participants are encouraged to focus on speed, control, stability, and maneuverability while ensuring reliable performance throughout the course.

The objective of the challenge is to complete the given task in the shortest possible time. The robot that successfully overcomes all obstacles—regardless of their size or complexity—and finishes the track in the least amount of time will be declared the winner. This event tests not only mechanical design and technical skill but also strategic thinking, precision handling, and the ability to perform under competition.

ROBOT SPECIFICATIONS:

- The dimensions of the bot should be less than or equal to 25 cm × 25 cm × 20 cm (l×b×h), failing which the team will be disqualified from the competition (this includes tires). A tolerance of (±5%) is permitted.
- The weight of the bot must not exceed 3kg. A tolerance of (±2%) is permitted.
- The dimensions of the remote are not included in the size constraint of the bot.
- The bot must be controlled manually only by one person.
- Both wired and wireless control options are available to teams. In the case of wired bots, the wire length should be at least 2 meters to ensure that the cable remains slack at all times.
- Participants should use a dual- frequency remote,
- Bluetooth, or Wi-Fi if they use wireless technologies.
- The bot must have an onboard power supply for wireless usage.
- Participants are not permitted to use any prefabricated Lego parts or grasping mechanisms. Participants may, however, use pre-assembled gear assemblies.

BATTERIES & POWER:

- The machine must be powered electrically only. Use of IC engines/engines is not allowed.
- Batteries must be sealed, immobilized electrolyte type (gel cell, lithium, NiCad, or dry cells).
- The electric voltage anywhere in the machine should not be more than 16.8V DC at any point of time.

GAMEPLAY & JUDGING CRITERIA:

- The competition is based on a time trail system. There will be a qualifying round for each team. The top teams from the qualifying round makes it to the final round on the basis of time trials.
- Wires should remain slack during the course of the run. Pulling the wire to aid the robot is not allowed.
- If any of the robots starts off before the start up call, the counter would be restarted and the machines would get a second chance. If repeated again then the team will be disqualified.
- Crossing checkpoints will account for points accordingly.

- Your robot must be ready when a call is made for your team. Only the driver is allowed to enter the track, Although a team mate is allowed to enter the track in case of wired bot to handle the wires.
- Team members will be allowed only three times to touch or reset their robots position during the run. However, this will lead to a time penalty and the timer will not stop during this course of action.
- The robot will be judged on basis of (in priority):-
- Number of checkpoints cleared. b. Time to complete the track.
- Any act of misbehavior and misconduct will lead to immediate disqualification
- No team will get a second chance after completing the track with a poor score.

TRACK SPECIFICATIONS:

- The track surface and course line may have unevenness.
- There will be certain obstacles in the race track which will try to slow down the robot.
- The design and size of the track may vary from that shown in the pictures.
- Arena will consist of Switch Bridge, speed breakers, marble pit, slippery path, rotating ting disc, curve ramp down, seesaw etc.

TEAM ELIGIBILITY:

- The team may consist of maximum 2 members.
- Every participating member must carry their Valid ID Proofs (in hard copy).
- Inter College teams are allowed.
- In case of any situation not explicitly mentioned in this rulebook, the final decision shall rest with the Organizing Committee, and such decision will be made in the best interest and spirit of the game.

EVENT COORDINATORS:

Dheeraj Patel 70075 51376

ROBO TUG OF WAR RULEBOOK

TASK:

Design and construct a manually operated robot, either wired or wireless, to compete in a rope-pulling challenge. The objective is to pull the opponent's robot across a central line using a connected rope or hook. This event tests the robot's power, traction (grip), and structural strength under high tension.

Participants are not permitted to use any prefabricated Lego parts or grasping mechanisms. Participants may, however, use pre-assembled gear assemblies.

BATTERIES & POWER:

- The machine must be powered electrically only. Use of IC engines/engines is not allowed.
- Batteries must be sealed, immobilized electrolyte type (gel cell, lithium, NiCad, or dry cells).
- Voltage: The electric voltage must not exceed 16.8V DC at any time.

GAMEPLAY & MATCH RULES:

- Match Style : 1v1
- Wires must remain slack; pulling the control wire to assist the robot's. movement iis forbidden.
- The first robot to pull the opponent completely across the designated central line wins the match.
- Only one operator is allowed no Controller will change during whole event.
- If a robot moves before the start signal, one restart is allowed; a second offense leads to disqualification.
- Only three manual touches or resets are allowed during the pull, resulting in a time penalty.
- Misconduct: Any intentional damage to the opponent or the arena will lead to immediate disqualification.

PENALTIES AND DISQUALIFICATION:

- Any act of misbehavior or misconduct will lead to immediate disqualification.
- The Organizers hold the sole discretion to modify or adjust these specifications and rules at any time. Any alterations will be communicated to the registered teams.

ARENA SPECIFICATIONS:

- The surface may have varying levels of friction to challenge the bot's traction.
- The pulling track will be a flat surface with a clearly marked center line and two finish lines.

TEAM ELIGIBILITY:

- The team may consist of maximum 3 members.
- Inter College teams are allowed. Every participating member must carry their Valid ID
- Proofs (in hard copy).
- In case of any situation not explicitly mentioned in this rulebook, the final decision shall rest with the Organizing Committee, and such decision will be made in the best interest and spirit of the game.

EVENT COORDINATORS:

Satyaprakash 84233 60360

NEXUS 2026 – The Tech Quiz

The Tech Quiz , where logic meets innovation . The quiz is architected around four core technological pillars that define the modern digital landscape:
– Computer Science Core – Artificial Intelligence – Current Tech Trends

Rules & Regulations

- Each team must consist of maximum 3 members . Participants must follow the instructions given by the event coordinators at all times. Mobile phones, smart watches, or electronic devices are strictly prohibited inside the venue. Any team found cheating or misbehaving will be immediately disqualified. Once the game starts, no participant can leave the venue unless in case of emergency.
- The decision of the judges and organizers will be final and binding.

Judging Criteria

The quiz is divided into the three stages as follows :

StageI:TheDebugger(WrittenPrelims)

- Format: Written/Digital MCQ/One word format. Elimination Round – top 8-10 teams qualify . Volume: 20–30 Questions covering all four domains. Tie-Breaker: Counter questions for tied teams.
- Stage II: Logic Gates
- Format: Verbal Round . This is also an elimination round. Top 5 teams move on to next stage.
- Each team gets 3 questions to answer .
- +10 for correct answer , -5 for an incorrect answer.
- Stage III: The Mainframe (Grand Finale)
- The final battle for the NEXUS championship.
- Pounce & Bounce (Infinite System)

1. Bounce: If the direct team fails, the question moves to the next for +5 points.
2. Pounce: Any team can ”Pounce” (signal/write) to answer before the direct team.
3. Scoring: Correct Pounce: +10 | Incorrect Pounce: -5.

Visual/ConnectRound (Buzzer Round)

1. Identification of hardware components, code snippets, tech personalities, or ”connections” between disparate images.
2. +20 for correct answer , -10 for incorrect answer

The Rapid Fire (Buzzer Round)

1. This round will contain around 8-10 questions .
2. The first team to click the buzzer gets the chance .
3. +20 for correct answer , -20 for incorrect answer .

Venue : LAB 2

Code Master – Official Rules & Regulations 2026

Rules and Regulations :—

- All participants must report to the event venue at least 30 minutes prior to the scheduled start time.
- Participants must carry a valid college ID card and event registration confirmation.
- Participants are expected to maintain discipline, decorum, and sportsmanship throughout the fest.
- Participants must perform or create artwork within the allotted time only.
- Use of unfair means, plagiarism, or external assistance is strictly prohibited.
- Participants are responsible for their personal belongings; the organizing committee shall not be liable for any loss or damage.
- Any clarification regarding rules must be sought before the commencement of the event.
- The level of the competition will be moderate. So the participant prepare accordingly.
- This competition will require knowledge in any one programming languages given below:—
  1. C
  2. Java
- Every participant would not required to carry their personal computer system.
- Teams or groupings of participants are not allowed in this event. All participant must participate individually.
- The competition start on 01:00 PM and end on 04:00 PM.

Competition Pattern :—

- **It contains question from both C and Java programming language.**
- **The competition consist of 6 questions and contains 50 marks :—**
  1. 5 marks for Moderate Level question
  2. 10 marks for High Level questions
- **The competition contains 4 programming question :—**
  1. 4 Moderate Level
  2. 2 High Level

- **This competition contains problems of two categories :—**
    1. Moderate Level
    2. High Level

- **Moderate Level contains following concepts :—**
    1. Pointers and Memory Management
    2. Strings and Logic
    3. Recursion and Algorithm
    4. Bit Manipulation
    5. Structure and Union

- **High Level contains following concepts**
    1. Concurrency and Multithreading
    2. Data Structure and Algorithms
- **It also involves 10 marks for the behavior of the participant.**

Judging Criteria :—

1. The participant who will try to attempt all question are given priority from other participants.
2. The participant who will attempt High Level Questions are given priority than other participants.
3. The marks will also be calculated form the behaviour of the participant.
4. Marks will be given after checking all the judgment criteria.
5. Additional 10 marks will be given to the participant.

Disqualification Clauses :—

- Use of mobile phones or unfair means during events.
- Violation of time limits beyond permissible tolerance.
- Use of offensive, vulgar, political, religious, or anti-national content.
- Damage to college property or misbehavior with organizers or judges.
- Failure to follow any one guidelines would lead to the rejection of the candidate.

Vibe Coding

The **Vibe Coding Competition** is a fast-paced, creativity-driven programming event designed to test participants' problem-solving skills, teamwork, and innovation under time constraints.
:

Rules & Regulations

- Each team will receive a **problem statement or theme** at the start of Round 1.
- Teams must develop their solution within the allotted time.
- Use of open-source libraries, frameworks, and tools is allowed.
- Copying code from other teams is strictly prohibited.
- Plagiarism or use of pre-developed full projects will result in disqualification.
- Teams must submit their final code or demo before the deadline.
- All teams from Round 1 will proceed to Round 2.
- Each team will get limited time to present in Round 2.
- Judges' decisions will be **final and binding**.
- Registration fee is ₹200/-
- Any violation of rules may lead to disqualification.

General Guidelines

1. All participants must report to the venue on time.
2. Teams must bring their own laptops, chargers, and required software.
3. Internet usage will be allowed unless specified otherwise.
4. All work must be done during the competition time only.
5. Pre-built projects or templates are not allowed.
6. Teams must follow the instructions provided by the organizers.
7. Any form of misconduct or unfair practice will lead to disqualification.
8. Each team must consist of a minimum of 2 and a maximum of 4 members.

Judging Criteria Round 1 – Coding and Progress Review

- Problem understanding: How clearly the team understands the problem and defines their approach.
- Logic and implementation: The correctness and effectiveness of the solution.
- Code quality and structure: Clean, readable, and well-organized code.
- Creativity and innovation: Originality and uniqueness of the idea.
- Working progress at review stage: How much of the solution is functional during the review.

Round 2 – Presentation

- **Clarity of idea:** How well the team explains the problem and their solution.
- **Working demonstration:** Functionality and stability of the prototype.
- **Innovation and usefulness:** Practical value and originality of the solution.
- **Presentation skills:** Communication, confidence, and structure of the presentation**.**
- **Response to judges' questions:** Ability to justify decisions and explain the technical aspects.

Problem Statement & Theme

The official problem statement and theme will be revealed on the spot at the beginning of Round 1. All teams must build their solution based only on the provided theme during the competition time.

Project Submission Requirement

Each team must submit their project with a clear title, a short description, a public GitHub repository link, and a live demo link. The solution must be fully functional and accessible online. Localhost demos will not be accepted. The GitHub repository should contain the complete source code and a basic README explaining the project.

Time	Phase	Description
11:00 – 11:10	Reporting & Setup	Arrival, registration check, and seating.
11:10 – 1:10	Coding Session	Teams build their solution; progress monitored.
1:10 – 1:40	Review Round	Judges check progress and shortlist teams.
1:40 – 2:10	Fix the rest code	Finish code before the presentation
2:10 – 3:10	Team Presentations	All teams present their projects.
3:10 – 3:30	Results & Closing	Results announced and event concludes

Student co-ordinator: **Bal Mukund Kumar (9693233843)**

Venue: Computer Lab 1

LIST OF EVENT:

BATTLE GROUND MOBILE INDIA (BGMI)

Date – 25 th February 2026

1.All participants must have the latest version of BGMI installed.

2.Players must use their own accounts; account sharing is prohibited.

3.Cheating, hacking, or use of unauthorized third-party software will result in immediate disqualification.

4. Players must join the custom room within the given time; late entries will not be entertained.

5.Respectful behavior is mandatory—abusive language or misconduct may lead to penalties.

FREE FIRE

Date – 25 th February 2026

1.All participants must have the latest version of Free Fire installed.

2.Players must use their own accounts; account sharing is strictly prohibited.

3.Any form of cheating, hacking, or use of unauthorized third-party software will result in immediate disqualification.

4.Players must join the custom room within the allotted time; late entries will not be allowed.

5.Respectful conduct is mandatory—abusive language, trolling, or misconduct may lead to penalties.

GENERAL RULES:

An individual team event where participants create a team -based on their gaming skill.

Rules & Regulations:

- All participants must have the latest version of BGMI/FREE FIRE installed.
- Players must use their own accounts; account sharing is prohibited.
- Cheating, hacking, or use of unauthorized third-party software will result in immediate disqualification.
- Players must join the custom room within the given time; late entries will not be entertained.
- Respectful behavior is mandatory—abusive language or misconduct may lead to penalties.
- Registration fee is ₹100/

Judging Criteria:

Gameplay Performance	40%	Kills, placement, damage
Team Coordination	25%	Communication, rotations
Technical Skills	20%	Aim, movement, utility use
Sportsmanship & Conduct	15%	Behavior, fairness

Team Composition:

- Each team must consist of4 players (Squad format).
- Teams may register 1 substitute player (optional).
- Team names must be unique and non-offensive.

Match Format:

- Total Teams: 10
- Mode: Classic Battle Royale – TPP (Third Person Perspective).
- Maps: Erangel, Miramar, Bermuda, Kalahari (rotation decided by organizers).
- Rounds:Group Stage: All 10 teams play 3–5 matches.
- Finals: Top 5 teams (based on points) play 2–3 matches.

- **Point System:**

Placement	Points
1st	15
2nd	12
3rd	10
4th	08
5th	06
6th-8th	04
9th-10th	00

#NOTE:

Kill Points:+1 point per kill.

Tie-breaker:Higher kills > Higher placement > Head-to-head result

Student co- ordinator:
Vibhas Srivastava (9450198419)

Venue: classroom G7/ G8

- **Technical Rules:**
  - Players must ensure stable internet connection.
  - Devices must not use any unfair hardware modifications.
  - If a player disconnects, the match continues; no rematch will be given.
  - Organizers may restart a match only in case of server issues or lobby errors
- **Code of Conduct:**
  - No stream-sniping or ghosting.
  - No teaming with other squads.
  - Players must follow organizer instructions at all times.
  - Violations may lead to warnings, point deductions, or disqualification.
- **Organizer Rights:**
  - Organizers reserve the right to modify rules if necessary.
  - Decisions made by referees/judges are final.
  - Any disputes must be raised immediately after the match

COMPUTER SCIENCE AND ENGINEERING
DEPARTMENTAL NON-TECHNICAL EVENT

Departmental Non-Technical event– Official Rules & Regulations 2026

General Guidelines

- Allparticipants must report to the event venue at least30 minutespriortothe scheduled start time.
- Participants must carry a valid college ID card and event registration confirmation.
- Participants are expected to maintain discipline, decorum, and sportsmanship throughout the fest. Participants can take part in only one event.
- Participants must perform or create artwork within the allotted time only. Use of unfair means, plagiarism, or external assistance is strictly prohibited.
- Participants are responsible for their personal belongings; the organizing committee shall not be liable for any loss or damage.
- Any clarification regarding rules must be sought before the commencement of the event.
- Event coordinators will entertain all queries related to events between 10:00
- A.M. and 4:00 P.M. on all working days.
- Last date for registration is 22nd February 2026.
- The participation fee once paid shall not be refunded under any
- circumstances.

Student co-ordinators

1. THE HORCRUX HUNT

A fast-paced **TREASURE HUNT** where teams race against time to decode clues, solve puzzles, and navigate through multiple checkpoints across the campus. Quick thinking, sharp observation, and strong teamwork are essential—only the most focused and coordinated team will reach the final treasure first.

Rules & Regulations

- Each team must consist of a maximum of 4 members. Participants must strictly
- follow the instructions given by the event coordinators. Any team found cheating
- or misbehaving will be immediately disqualified.
- The decision of the judges and organizers will be final and binding.
- Registration Fee: ₹150/-

Student Coordinators: Manas Agrawal

Venue: College Campus

Disqualification Clauses

- Use of unfair means during the event. Damage to college property or
- misbehavior with organizers or judges. Failure to adhere to event-
- specific rules.
- Tearing or damaging clues or QR codes

2 VELOCITY VERTICES (Rubik's Cube Competition)

Velocity Vertices is a high-energy Rubik's Cube competition designed to test speed, memory, logic, presence of mind, and problem-solving skills. This event brings together cube enthusiasts to compete in a structured, fair, and competitive environment. Participants will challenge themselves across multiple rounds that evaluate accuracy, speed-solving ability, consistency, and pressure handling.

Rules & Regulation

- The competition will follow the Average of 5 (Ao5) format; each participant must complete five solves. Participants are allowed 15 seconds of inspection before each solve. Judges will give warnings at 8 and 12 seconds.
- Both hands must be placed flat on the timer before starting the solve.
- No external assistance or coaching is permitted during the solve.
- At the completion of the solve, the timer must be stopped using both palms.
- After stopping the timer, participants must not touch the cube until the judge has verified the result.
- Only a standard **3×3** & **4×4** cube in clean and proper working condition is permitted.
- The judge's decision shall be final. Any form of cheating or misconduct may result in disqualification.
- Registration fees is ₹50/-

Student co-ordinator: Amardeep Kumar(7905032220)

Venue: classroom G2

3 THE ESCAPE ROOM

Welcome to the Escape Room Challenge, where logic meets adrenaline! Participants will be locked inside a themed room filled with hidden clues, puzzles, and riddles. The objective is simple—but not easy: work as a team, solve all the puzzles, and escape the room within the given time limit. This game tests problem-solving skills, teamwork, time management, and presence of mind. Every clue matters, every second counts, and only the sharpest minds will make it out in time!

Rules & Regulations

- Each team must consist of maximum **2 members (DUO)** The time limit for the escape room will be **90 minutes**. Participants must follow the instructions given by the event coordinators at all times.
- No physical force is allowed. Do not break, damage, or remove any props.
- All clues must be solved inside the room only—no outside help is allowed.
- Mobile phones, smart watches, or electronic devices are strictly prohibited inside the escape room.
- Teams are allowed to take a limited number of hints (if provided).
- Any team found cheating or misbehaving will be immediately disqualified.
- The decision of the judges and organizers will be final and binding.
- Registration Fee: ₹150/-

Judging Criteria

- Completion Time
- Numberof PuzzlesSolved
- More correct puzzles solved = higher score.
- Use of Hints
- Fewer hints used will earn bonus points.
- Teamwork & Coordination
- Rule Compliance
- Effective communication and collaboration will be observed.
- Accuracy

Student co-ordinator: SMRITI VERMA (9236189910)

Venue: classroom G2

4. DEBATE CHARADES

Debate Charades is a flagship intellectual event of ABHYUDAYA – The Annual Fest of Ashoka Institute of Technology & Management, curated especially for Computer Science students. The event blends charades, debate, and instant decision-making, creating a platform where ideas clash, perspectives flip, and confidence shines. Participants compete in teams across three progressive rounds, each with a distinct theme and increasing difficulty. Using a unique two-bowl system—one for topics and one for FOR/AGAINST—teams must think on their feet and defend viewpoints assigned at random.

Rules & Regulations

- Participation is strictly team-based; individual entries are not permitted.
- Each team must consist of a minimum of two members (a duo is compulsory). A team may include a maximum of four members. Team members are free to internally decide which participants will speak FOR and AGAINST the motion.
- The event will follow a mandatory two-bowl system: one bowl for selecting the topic and another for
- assigning the FOR/AGAINST position at random.
- Use of mobile phones is strictly prohibited during the competition.
- All prescribed time limits must be strictly adhered to in every round.
- The decision of the judges shall be final and binding.
- Any form of indiscipline or violation of rules may result in disqualification.
- Participants are expected to maintain fairness, integrity, and good sportsmanship throughout the event
- Registration Fee: ₹150/-.

Student co-ordinator: Nikunj Srivastava (9621084001)

Venue:G3

5. INTELLECT FUSION

Intellect Fusion is a flagship multi-stage event conducted as part of the Annual Fest ABHYUDAY at Ashoka Institute of Technology and Management. The event challenges participants through a blend of logic-based, creativity-driven, coordination-focused, and pressure-based games. The event is non-technical in nature and open to students of all academic years.

Rules & Regulations

- **TeamStructure:** Each team must consist of exactly four members, and the same team must participate throughout all stages of the event.
- **Stage-wise Participation:** Only **one team member is allowed to actively participate in each stage,** and
- A participant cannot compete again in later stages. All four members must participate once. Substitution is not permitted after the event begins.
- **Stage 1 – Emoji Coding:** Teams must interpret emoji-based representations of Computer Science concepts within the allotted time. Only the designated player may answer, and the use of electronic devices is strictly prohibited.
- **Stage 2 – Taskmaster Lite**: The selected player must construct a structure using only the materials provided. The structure must hold a bottle at least 30 cm above ground for 10 seconds. Verbal guidance from teammates is allowed.

- ·**Stage 3 – Control the Chaos:** The designated participant must arrange cups into the required structure and balance a ball on top. Teammates may guide verbally. Dropping the ball results in a 10-second penalty, and incorrect structures must be rebuilt.
- ·**Stage 4 – The Pressure Box**: The final unused member must identify the false clue among six provided clues and determine the correct final answer. Time limit: 5 minutes. The first team to submit the correct answer wins.
- ·**Use of Fair Means**: The use of mobile phones, electronic devices, or any unfair methods is strictly prohibited throughout the event.
- ·**Judging Criteria**: Teams will be evaluated based on accuracy, logical reasoning, creativity, time management, coordination, communication skills, and ability to perform under pressure.
- ·**Disqualification Policy:** Teams may be disqualified for misconduct, ignoring instructions, disturbing the event, copying from others, or using inappropriate language. Judges' decisions are final and binding.
- ·Registration Fee: ₹150/-
